Intelligence as a Force Multiplier: NFIP Support to US Military ForcesResults of Meeting of the CIPC Working Group, 30 September 1986Proceedings

1. The group (see the Appendix for a list of attendees) reviewed progress on the contributions that are in preparation and that are keyed to the first two tasks of the study implementation plan as follows:

Task One

Force Multiplier/Definitional. Major Berns, the Army representative, has planned a number of interviews with senior military officials and plans also to query certain U&S Command CINCs. The results will be incorporated in his contribution for which he requested an extension to the implementation plan due date of 7 October.

Historical Examples. [ ] CIA, reported that there is very little extant literature of any kind on the subject of force multiplier. There is, however, one book that he has found that is relevant (on the subject of "electronic warfare"). A forthcoming conference on low intensity conflict might also be yielding of some ideas to be developed in satisfying this requirement.

25X1

Review of other Multiplier Studies. P. Torelli, DCA, discussed communications/dissemination, and INCA, and observed that previous multiplier work done for the DCA was too general for any application to this effort. A more "aggressive" search might yield additional historical documents for possibly profitable review and application.

Theater Warfighting/Definitional. Lt Col Maxie, the USMC representative, reported that his definitional work is in the process of coordination with a host of DoD components.

Task Two

Military Operations/Mission Areas. Captain Vosilus, the Navy representative, reported a lack of progress because of competing demands. He nonetheless felt that his contribution could be completed in two weeks or so.

Intelligence Functions. The Air Force representative, who has the lead on this subelement, was not present to report on the status of this contribution.

Next Steps

2. The new date for the contributions mentioned above (Tasks One and Two) is 31 October. Contributions should be provided to the Chairman. They will be the basis of a consolidated draft that will be sent to the Working Group members before the next meeting to be scheduled at a later date.
